

## **CSIO Announces Launch of My Proof of Insurance eDelivery Solution**

**(Toronto – February 21, 2018)** CSIO is pleased to announce the official launch of its My Proof of Insurance eDelivery solution. The solution enables CSIO members to send consumers digital policy documents, including proof of auto insurance (eSlips), for personal and commercial lines, and is available to members at no additional cost.

The My Proof of Insurance eDelivery solution was developed by CSIO, in collaboration with brokers and carriers including Gore Mutual, Northbridge Insurance and RSA Canada to meet evolving consumer demands for anytime, anywhere, any device interaction. Features include:

- Sends PDF policy documents and eSlips via email – consumers are not required to download apps or log into portals
- Leverages mobile digital wallets to store and display eSlips
- Co-branded emails include broker and carrier logos, sent from the @myproofofinsurance.ca domain

In addition, CSIO has launched the informational website [www.myproofofinsurance.ca](http://www.myproofofinsurance.ca) to support members in communicating the solution's benefits to consumers.

"We are incredibly excited to make the My Proof of Insurance eDelivery solution available to the broker channel," says Catherine Smola, President and CEO of CSIO. "I applaud the members of the project team for their vision to develop a solution that creates such a convenient digital touchpoint with their customers. As more regulators join Nova Scotia in approving eSlips, we anticipate that consumer demand for this solution will grow."
